

Supporting EL Students in Afterschool Programs

Maria Dantas-Whitney, Ph.D.
Western Oregon University
dantasm@wou.edu

21st Century Community Learning Centers
Fall Conference
November 20, 2015

Session Overview

- Sharing experiences, successes, challenges, questions
- The Language Acquisition Process
- Principles and Strategies

Relevance

Engagement

Authenticity

Carrousel Brainstorming

- ◎ **Profiles** of the English Learners in my program
 - > age
 - > linguistic/cultural/social backgrounds
 - > academic needs
- ◎ **Successes** I have had in supporting these students
- ◎ **Challenges** I have had in supporting these students
- ◎ **Questions** I have about best practices

Types of Bilingualism

(Garcia, 2010)

FIGURE 4.2. Types of Bilingualism

**Subtractive
Bilingualism**

**Additive
Bilingualism**

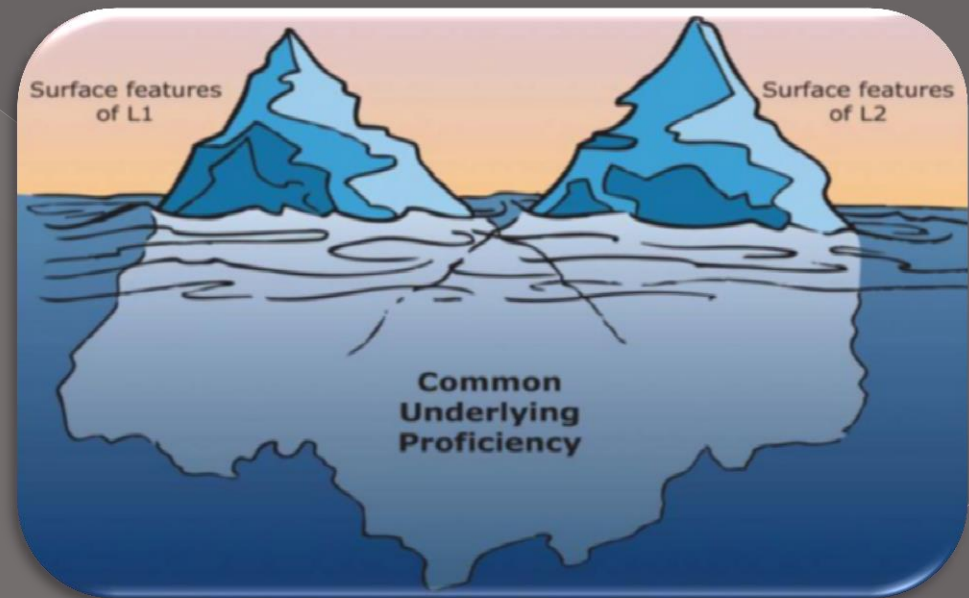

**Dynamic
Bilingualism**

Common Underlying Proficiency

Cummins (2000)

- Common Underlying Proficiency refers to the interdependence of concepts, skills and linguistic knowledge found in a central processing system
- Cognitive and literacy skills established in the primary language will transfer across languages

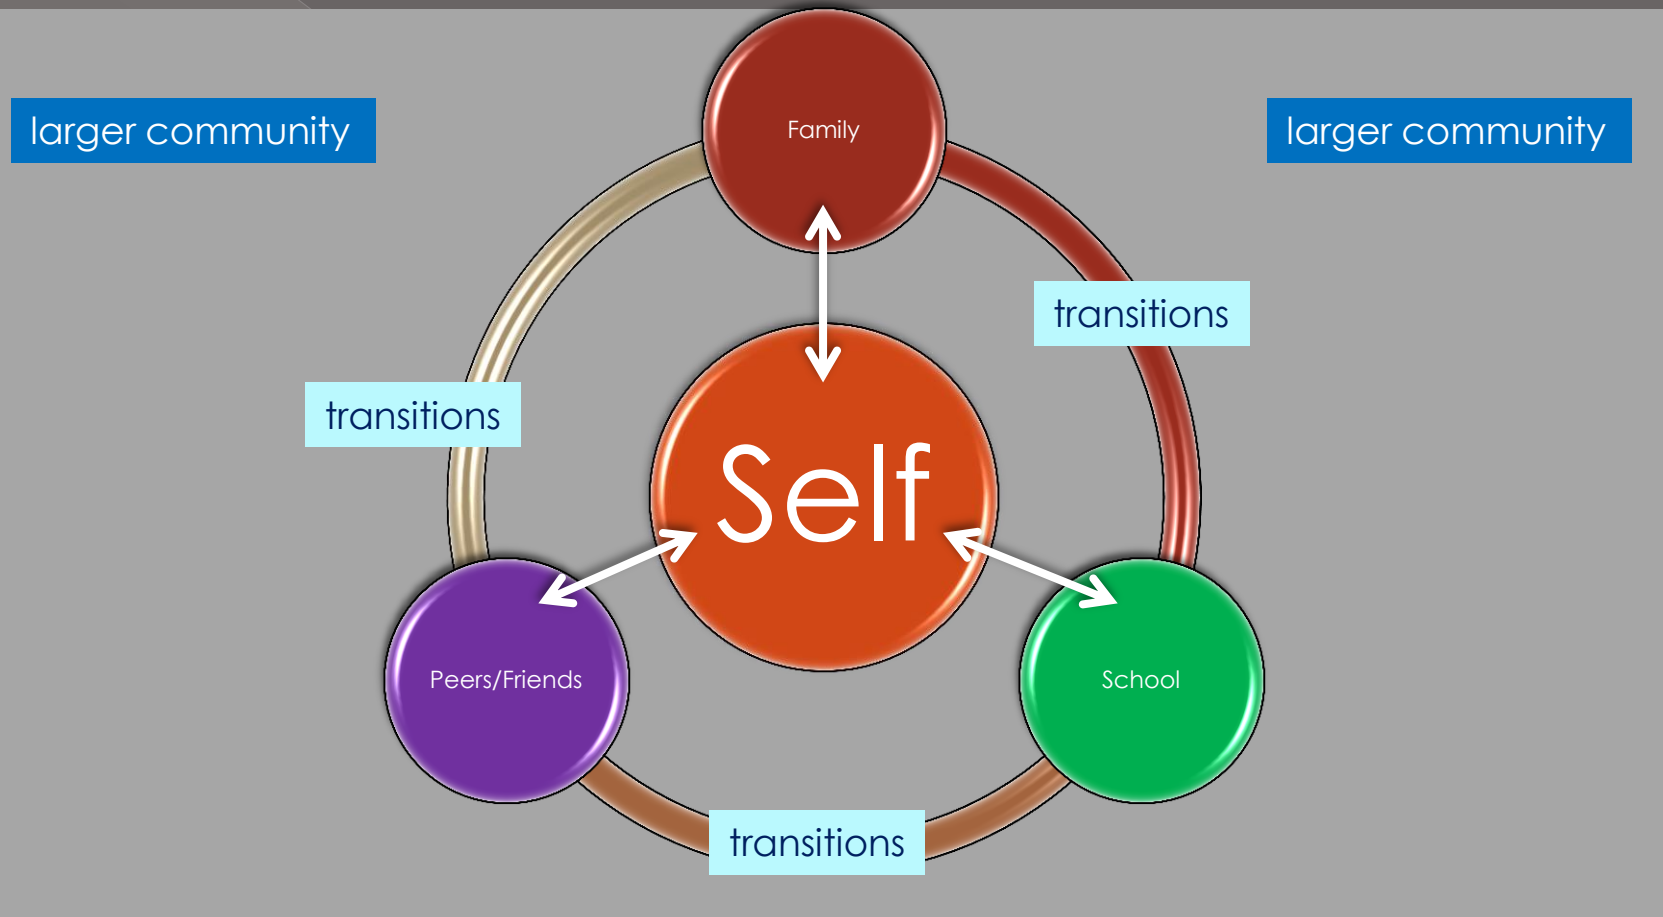

Factors Influencing the Length of Time Needed to Acquire English

- Quality and length of previous education
- Prior English learning experiences
- Literacy levels in the family
- Mobility
- Family separation
- Cultural isolation
- Exposure to social unrest, war, or trauma

A Model of Children's Multiple Cultures

(Garcia, 2002)

Family Values and School Values

*“Children need to find within the structure and content of their schooling those behaviors and perspectives that permit them to switch between home and school cultural values without inner conflict or crises of identity”
(Garcia, 2002, p. 22)*

Language Acquisition

- Language is learned in meaningful, supportive and communicative settings
- Errors often indicate that learning is taking place.
- We often understand more than we can say
- Beginning learners often got through a silent period
- It takes a lot of time for us to become fluent

Social vs. Academic Language

Social Language (BICS: Basic Interpersonal Communication Skills)

- Shorter sentences, simpler vocabulary and grammar
- Informal settings
- Familiar topics (friends, daily life)
- **Takes 1-2 years to acquire**

Academic Language (CALP: Cognitive Academic Language Proficiency)

- Longer sentences and more complex grammar; sophisticated vocabulary
- Little situational context (lectures, textbooks)
- New and difficult topics; abstract knowledge; student often has less background knowledge to build on
- **Takes 5-7 years to acquire**

Scaffolding

Temporary help for learners to complete a task until they can perform independently

- Take into consideration students' ...
 - interests and background experiences
 - content knowledge
 - language proficiency levels
- Hands-on activities and cooperative learning
 - Teacher-centered presentations interspersed with small group tasks
 - Preview/review
 - Learning centers, drama/role play
- Visuals, gestures and linguistic supports
 - Graphic organizers, pictures, sketches
 - Sentence frames, starters, transition words
 - Primary language support and biliteracy development
 - Monitor, assess, and adjust

Relevance

- Classroom activities help learners access experiences and prior knowledge
- Provide opportunities for students to bridge their knowledge of content and language from their L1 to English.
- Utilize students' "funds of knowledge" (González et al., 2005)
- Tap into the local culture. Build relationships with families/community

KWL and Observation Charts

What do I know?	What do I want to know?	What have I learned?

Anticipation Guides

Rank these forms of transportation in order from slowest to fastest. Write number 1 next to the one you think is the slowest, up to number 10 next to the one you think is the fastest. When you finish numbering, write down a speed for each one.

- _____ Motorcycle
- _____ Train
- _____ Skateboard
- _____ Race car
- _____ Tractor
- _____ Bicycle
- _____ Inline skates
- _____ Rowboat
- _____ Jet plane
- _____ Ship

Figure 5.5 What Do You Know About Speed?

Language Experience Approach

Taylor, 1992

1. **Conducting the experience.** The class participates in an experience together.

In the classroom

Preparing food (sandwich, French toast, salad, popcorn)

Class projects (simulations, bulletin boards, skits)

In the community

Taking field trips (around the school, to the bank, market, malls, library, city hall)

2. **Discussing the experience.** During the discussion, the teacher asks questions and writes key words on the board. Learners can:

- Reconstruct the sequence of events
- Describe places, actions, etc.
- Share feelings

3. **Developing a written account.** Learners may dictate a description or sequence of events while the teacher writes it down, or a group of students may work to produce an account.

4. **Reading the account.** The teacher or a learner can read it aloud to the class, focusing on key words and phrases, and then learners can read it silently on their own.

5. **Extending the experience.** The following possibilities can be adapted according to learners' proficiency levels.

- have students match words with pictures or definitions;
- select words from the story for vocabulary, spelling, or sound-symbol correspondence activities;
- use the texts to review a grammar point, such as sequence of tenses, word order, or pronoun referents;
- scramble pictures and key words and have students unscramble them.
- write other types of texts--songs, poems, letters (for example, a letter to the editor), or directions for how to do something.

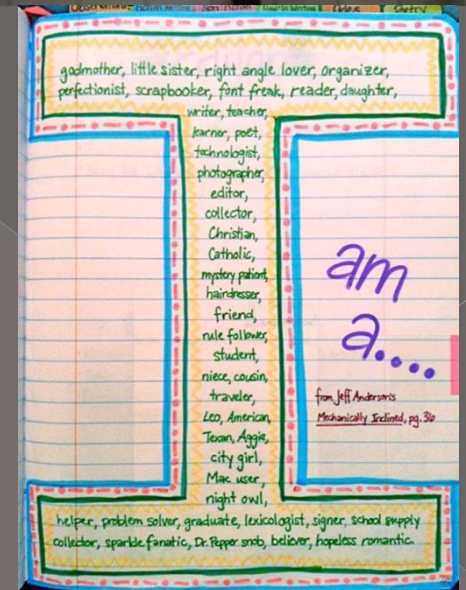

Engaging Learners' Identities

- It is through language that a person negotiates a sense of self within and across different sites at different points in time
- Language teaching and learning is always about acquiring new identities in a context where learners' previous identities are respected
- Optimal learning occurs when there is **maximum cognitive engagement and maximum identity investment** on the part of students

(Cummins, 2006; Norton Peirce, 1995)

Identity Texts

(Cummins, 2006)

Primary Language Support

- Use bilingual books and labels. Get students to produce them.
- Utilize homogeneous grouping so students can problem-solve with each other in their common L1.
- Encourage discussions of class topics at home in the L1.
- Encourage code-switching.
- Encourage students to explore cognates
 - 30-40% of all words in English have a related word in Spanish. For Spanish-speaking ELLs, cognates are an obvious bridge to the English language.

Code Switching in Writing

wednesday

November 13

Today is wednesday November 13. 05. Tomorrow is Thanksgiving day. So I ~~am~~ very happy. Today Ms. Mui teach we make turkey. 我先将 turkey 上 colout, 然后给 turkey 的翅膀上 colout. 然后剪下来再用线来围。不一会儿两只 turkey 出现。不过有的 turkey 翅膀受了伤飞不起来。不过 my turkey 还是可以飞起来。可是这个 turkey 做了也没用除了用来玩。但是它中看不中用。

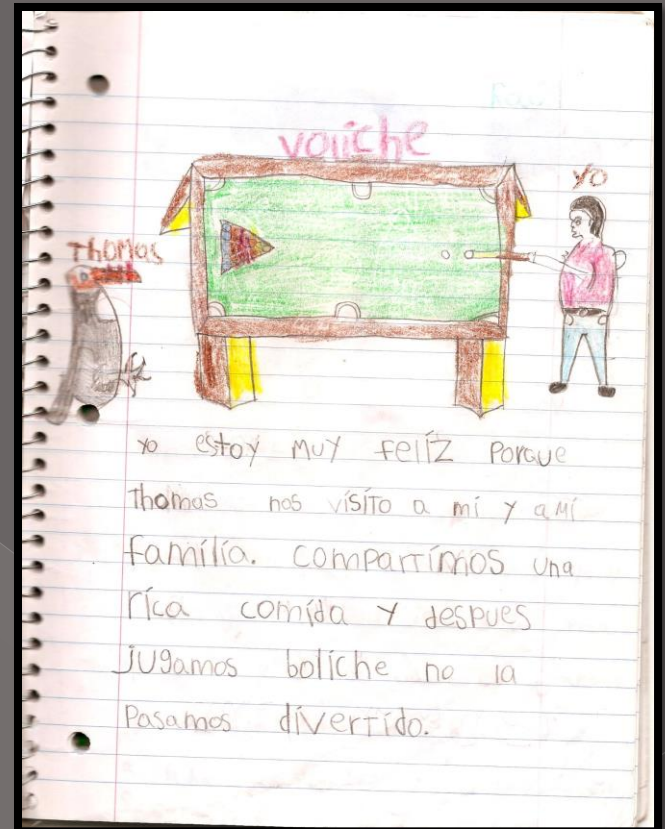

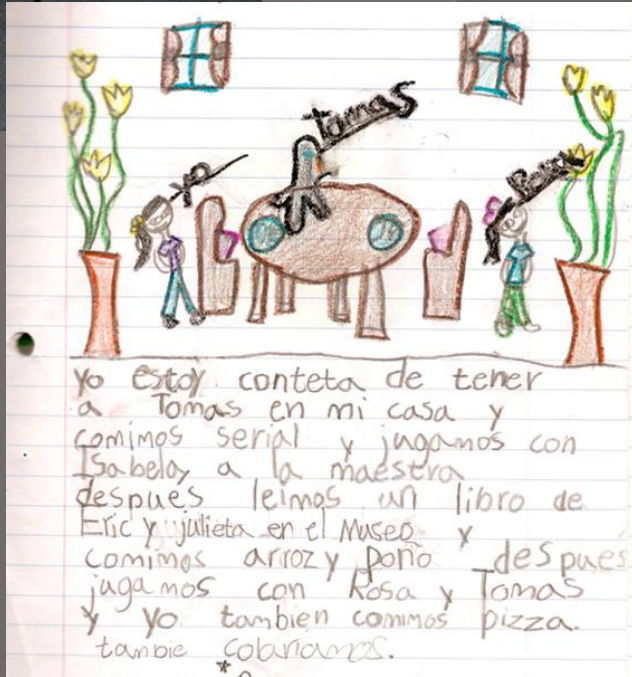

回家时 I go to bathroom bathe. 然后 do ~~the~~ home work and the table. 最后吃完饭 go to bed close eye.

Explore Cognates

Academic Word	Spanish Word	Common Word
encounter	<i>encontrar</i>	meet
observe	<i>observar</i>	watch
maintain	<i>mantener</i>	keep
ultimate	<i>último</i>	last
equal	<i>igual</i>	same
entire	<i>entero</i>	whole
quantity	<i>cantidad</i>	amount

Building connections with families

Building connections with families

Engagement

- Verbal interaction and negotiation of meaning are essential for language learning.
- It's important to use different grouping configurations: partners, small groups, large groups; homogeneous and heterogeneous groups.
- Groups must be monitored and interactional language must be taught.

Instructional Conversations

Graphic organizers

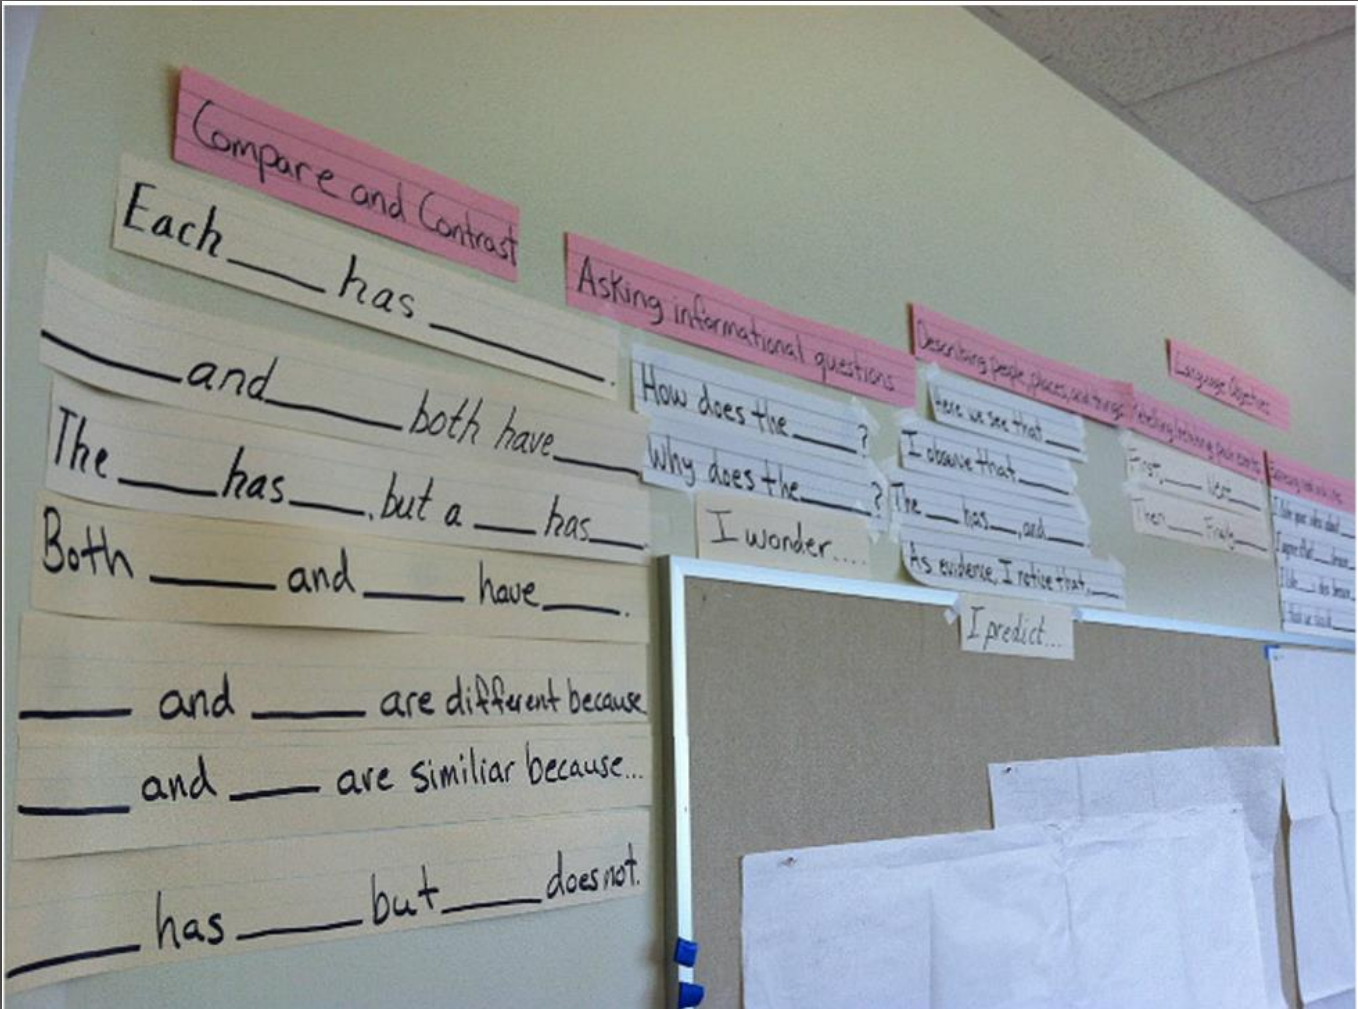

Increasing Oral Interaction

- Think-Pair-Share
- Numbered Heads

- Jigsaw

Sentence Frames

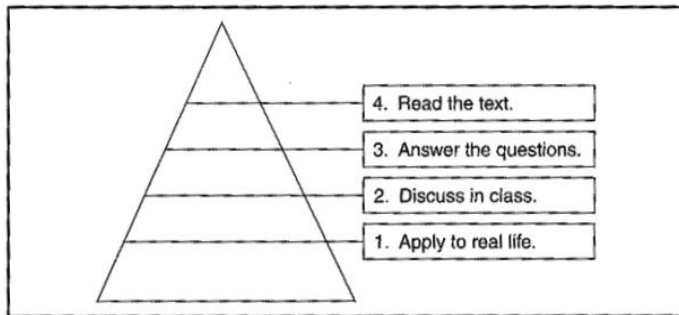

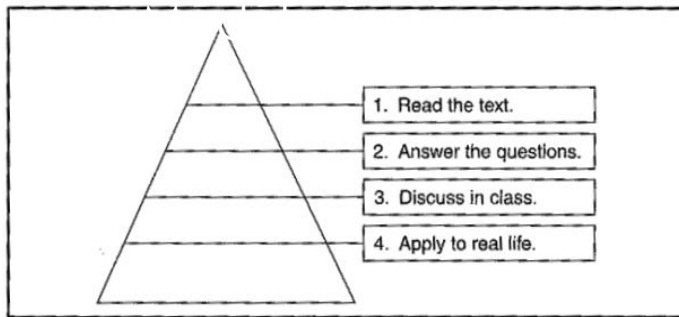

Note-taking

Main Ideas	Details/Examples
1. Nomads are groups of people who	1. move from place to place 2. _____ 3. _____
2. Nomads are hunters or herders ...	1. _____ 2. _____ 3. _____ 4. _____
3. Nomads are people who live (where?)	1. in the desert 2. _____ 3. _____
4. Bedouins	1. are _____ 2. travel _____ 3. herd _____ 4. _____ 5. _____ 6. _____

Reading in Reverse

Traditional

New Model

Step 1. Apply to real life.

Talk about:

- personal experience with moving.
- immigration experiences.
- experiences with frequent moves to seek employment, other reasons.
- migrant worker experiences.

Step 2. Discuss in class.

Talk about the following:

- Is moving from place to place "fun?" Why/why not?
- Does it feel different if the move is voluntary or forced?
- Compare leaving school, friends, and family behind to taking it all with you. (This is the time to introduce the word and the concept of *nomads*.)
- Look at pictures in the text to compare differences among nomad homes and students' homes.

Step 3. Read the questions—and the section and subsection headers.

Ask the following:

- What is this section about?
- What information will this section focus on?
- What is the main idea of this section?

Step 4. Read the text.

- Read one section at a time.
- Follow each section reading by discussing the questions in Step 3.

Complex Sentences: Independent Access for Your ELLs

Sentence Dissecting Strategy

1. Give each group a copy in large print of the same syntactically complex sentence which contains key information on the topic being studied.
2. Specify the amount of time for groups to “dissect” the sentence. This means they write down as many simple sentences as possible based solely on the information in the given sentence.
3. At the end of the allotted time, groups post their charts of the dissected sentence around the room.
4. The group with the most valid dissected sentences wins.

by Elizabeth Hartung-Cole (2015)

Example: Sentence Dissecting Strategy

- In an event leading to the outbreak of World War I, Archduke Franz Ferdinand, nephew of Emperor Franz Josef and heir to the throne of Austria-Hungary, was assassinated with his wife by a Serbian nationalist in Sarajevo, the capital of Bosnia, in 1914.

- **One Group's Valid Responses**

- 1. Archduke Franz Ferdinand was the heir to the throne of Austria-Hungary.
- 2. Archduke Franz Ferdinand was assassinated.
- 3. Archduke Franz Ferdinand's wife was assassinated.
- 4. They were killed by a Serbian nationalist.
- 5. They were killed in Sarajevo.
- 6. Sarajevo is the capital of Bosnia.
- 7. They were killed in 1914.
- 8. This assassination led to the outbreak of World War I.
- 9. Archduke Ferdinand's first name was Franz.
- 10. Emperor Josef's first name was Franz.
- 11. Austria-Hungary had a throne.
- 12. Franz Ferdinand was an archduke.
- 13. Franz Josef was an emperor.
- 14. Emperor Franz Josef was Archduke Franz Ferdinand's uncle.

Authenticity

- Learning is a complex, dynamic and situated process, as opposed to simply a collection of technical skills
- Students develop higher-order thinking abilities based on the teacher and students co-constructing knowledge and understanding

Multimodalities

- Multiple modes of representation (e.g., drawing, dramatic performances, songs) act as mediational tools to help learners to build new knowledge (Kendrick et al., 2010)
 - makes the abstract concrete
 - fosters creativity, collaboration, communication
 - accesses different areas of the brain

Environmental Print

- The print of everyday life: symbols, signs, labels, advertisements
 - > bridges the gap between the classroom and learners' worlds
 - > Fosters linguistic development through familiar language
 - > involves authentic materials children can relate to

1. **Alphabetize Your Labels**
Create an Alphabet Label Book

2. **Think it Through**

Students draw a label out of their bags and write the initial letter or letter sound at the top of their paper.

4. **Story Creations**

Have students choose three to four labels out of their bags, create a story using their labels, and then share their story aloud.

3. **Go Fish**

This activity is based on the childhood game of Go Fish, but instead of using traditional playing cards, students use environmental print cards.

Player One Do you have any Diet Cokes?

Player Two No, I don't have any Diet Cokes.

Go Fish. Do you have any Pepsi cards?

Player One Yes, I have two Pepsi® cards.

Language Games

Herrell & Jordan, 2012)

Syntax Surgery

A strategy that allows students to see the relationship of elements within a sentence that may be confusing to understand.

Steps:

1. *Identify a problematic sentence*
2. *Write the sentence on a strip and cut it apart into understandable pieces*
3. *Involve students in a discussion on how to rearrange the words*
4. *Practice more sentences with the same pattern*

Being able to visually see the sentence being arranged helps students grasp and remember the grammatical pattern.

Learning collocations through a "Snakes and Ladders" game (Nakamura,, 2003)

SUGGESTED VOCABULARY for intermediate level elementary school students

Blue Cards	Red Cards	Blue Cards	Red Cards
do	my homework	play	tennis
go to	a restaurant	read	comics
go to	bed	take	a bath
go to	school	take	a nap
listen to	music	watch	videos
play	computer games	watch	TV

Digital Media and the Internet

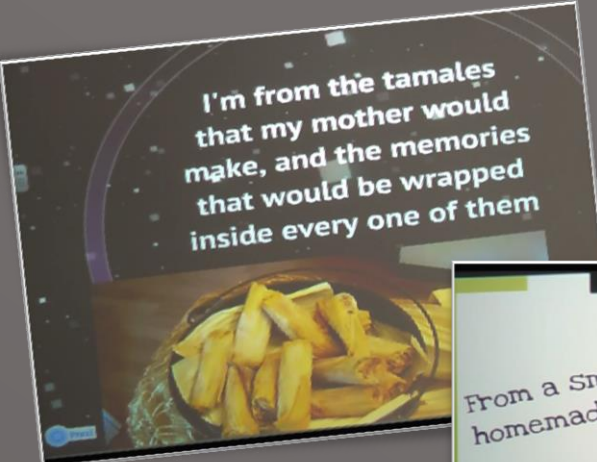

- Technology makes real world contexts accessible to learners
- It enables students to explore their identities through relationships with their community, culture, and world (Warshauer, 2003)

Digital Storytelling

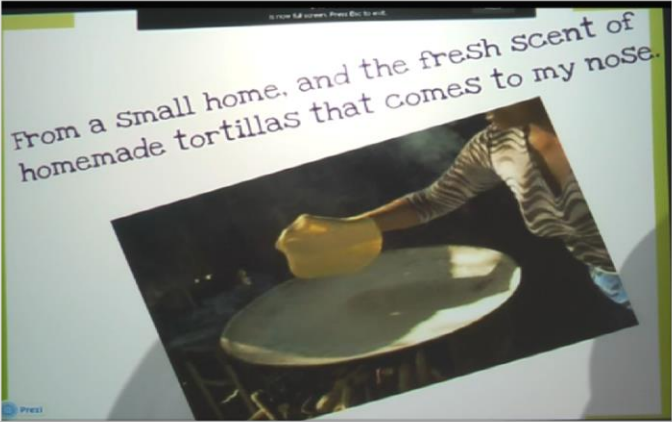

Digital Story

- the telling of a significant story (your own or another's)
- through the digitized visual presentation of a series of image captures (still photos, drawings, video clips, icons)
- the inclusion of text (titles, captions, word art)
- the relating of that story in the voice of the creator
- often accompanied by music

I'm from the tamales
that my mother would
make, and the memories
that would be wrapped
inside every one of them

Foltz, 2013

From a small home, and the fresh scent of
homemade tortillas that comes to my nose.

Rance-Roney & Young (2010)

INPUT

- Read authors' narratives
- Understand the storytelling genre
- Explore examples of digital stories
- Brainstorm ideas for the DS
- Form a word and digital image collection
- Practice with software program
- Journal or freewrite one's own narrative

PRE-PRODUCTION COMPOSING

- Reflect on one's extended narrative
- Seek feedback from others and revise
- Produce DS text/script
- Seek feedback on script, revise and edit
- Select digital images or video
- Storyboard the script (merge images & text script)
- Practice oral presentation of script

PRODUCTION

- Input images into digital storyboard
- Manipulate images, create special effects
- Record DS script
- Input music
- Preview and revise

PRESENTATION

- Save digital story in final format (computer file, DVD, CD)
- Plan and execute public sharing or presentation of digital story

3-2-1 Review

○ 3 things I learned today are:

1. _____
2. _____
3. _____

○ 2 words I want to remember are:

1. _____
2. _____

○ 1 thing I found very interesting is:

1. _____
